Physical/Occupational Therapy Prescription

Name:	Date of Birth:	
Diagnosis: <u>Shoulder pain</u>	_Code:M	25.519

Instructions:

- Muscles to focus upon: Rhomboids, Trapezius, Levator, and Serratus Anterior.
- Phase I:
 - Goals: Initiate voluntary control, re-establish balance, and normalize mobility.
 - Incorporate postural education.
 - Suggested exercises:
 - Prone horizontal abduction in neutral rotation and external rotation
 - Supine *Serratus Anterior* punches
 - Standing scapular retractions against resistance bands
 - Standing table lifts with scapular retraction
 - Push-ups onto the wall
 - Sidelying neuromuscular control drill (with resistance)
 - Prone rowing with dumbbells
 - Pectoralis minor and posterior capsular stretching
 - Adducted and abducted internal and external rotational strengthening.
 - Core strengthening (planks) if shoulder is pain free during these exercises.
- Phase II:
 - Goals: Improve balance, enhance stabilize, improve proprioception
 - Suggested exercises:
 - Pectoralis minor stretching
 - Prone rowing
 - Prone horizontal abduction on a ball in "I", "W", "T", and "Y" formations
 - Standing table lifts with retraction and external rotation
 - Push-ups onto a ball (table)
 - Push-ups onto two plyoballs onto the wall
 - Sidelying neuromuscular control drills with and without resistance
 - Core strengthening (planks)
- Please provide with a home exercise program to be performed throughout
- Progress as tolerated.
